Capo II

D G A
Won't you come and sit beside me
D G A
But give me room enough to breathe
D G A
So many things I need to tell you
 Em A
Before you leave, before you leave

Never would have guessed when first I met you
But with the passing of each day
Something strange is growing deep within me
Won't go away, it won't go away

Chorus:

G A
And the stars fell down
G A
And my head was spinning round
Em Bm G A
Felt I was drowning and that no one heard my cries
Em A
Searched in vain for solid ground

Knew I'd sink in deeper if I struggled
Something far too strong was in control
Closed my eyes and prayed I'd be delivered
But you had my soul, you owned my soul

Never saw it coming from the outset
Now it's smacked me right between my eyes
Did you plan it all from the beginning?
Or were we both just victims of the tide?

Chorus

Got to take a look at my position
Do I take my bearings from the heart
Or do I trust my mind to be my compass
Couldn't bear for us to drift apart

Please won't you come and sit beside me
But give me room enough to breathe
So many things I need to tell you
Before you leave, before you leave
