

Can't wait 'til Friday comes around
©Martin Browne 20 July 2002

C Capo II

C G Am Em
The rain is driving hard against my windscreen
F C G
Looks just like the sky is falling down
C G Am Em
Been stuck in traffic for the best part of an hour
F G C
Can't wait 'til Friday comes around

God knows I miss you, ache inside to touch you
A distant engine makes a lonely sound
Just three more days and then I'll meet you at the station
Can't wait 'til Friday comes around

F G C C/B Am Am/G
Why does time drag its heels whenever you're away
F G C
And fly like fury when you're here
F G C C/B Am Am/G
It's just the thought of your sweet smile that helps me through each day
F C G
And makes all thoughts of sadness disappear

Summer's now a memory, indistinct and hazy
You laughed at those old photographs I found
But all the time we knew it wouldn't last forever
Can't wait 'til Friday comes around

Autumn leaves are turning, a cooler wind is blowing
Shakes them loose and speeds them to the ground
Hate the thought of winter, miss you more than ever
Can't wait 'til Friday comes around
