

Endless D Capo II Standard Tuning
©Martin Browne 10 March 2002

D G A D
I know you're feeling tired, you've had a busy day
G D A
I'm sure you'd rather close your eyes
D G A D
But before you drift away, there are some words I'd like to say
G D A G D
You have to know my love for you is as endless as the skies.

I'm sure that there were times, you thought I didn't see
Your faithful shadow at my side
It wasn't that I didn't care for the comfort of your being there
Though my lips were silent my eyes were open wide.

[Chorus]:

G D A D
So settle in my arms again, I feel your breath upon my skin
G D E7 A
Let all the problems of the day just melt into the night
D G A D
Let my arms embrace your pain, cool your brow like summer rain
G D A G D
And we will see more clearly in the early morning light.

The daylight hours go sailing by, there's never time to wonder why
Before we knew it time had flown
Let's slow things down and ease the pace, those wasted years we can't replace
So let's grasp what lies ahead and make that time our own.

[Chorus]
