

Let The Sun Go Down Standard Tuning Capo2
©Martin Browne 20/10/2001

[Chorus]

G D C G
Let the sun go down, we'll start again tomorrow
D C D
Let the tide flood in and wash it all away
G D C G
Put on a brand new face, your smiles will melt my sorrow
D C D G
I know with friends like you that we can face another day.

G D C G
When work gets hard and life seems to have no feeling
D C D
When it seems like you're the only one who swims against the tide
G D C G
Don't be dragged down, don't bang your head against the ceiling
D C D G
Let the current work for you, lie back, enjoy the ride.

[Chorus]

Just when you thought you'd got it right and things were ticking over
Something comes from out the blue and drags you through the mire
But while you're down, look around, you just might find that four-leaved
clover
Just like the phoenix you will rise up from the fire.

[Chorus]

Every night on the screen, there are scenes of human sadness
There are times when all the tragedy seems far too much to bear
But a small flame of hope always shines through all the madness
And the strong hand of humanity hauls another victim clear.

[Chorus]
