

Warmer Days Standard Tuning G, Capo II
© Martin Browne 21 November, 2001

G G/C G
We watched the sun go down together
Am C D
...Such days as these are hard to find
G G/C G
...Summer's warm embrace won't last forever
Am C G
...And it's weighing heavy on my mind.

D C G D
Something's calling from afar and taking you away
Am C G
I know I couldn't stop you if I tried
D C G D
But though the winter nights are long the springtime will come round
Am C D
And warmer days will find you at my side.

Nothing stays the same, life re-arranges
Joy to sorrow, sun to driving rain
Travel with the tide and ride the changes
To feel the pleasure we must take the pain.

So take the road that you must follow
If that is where you feel that you belong
I'll find a way to cover up the sorrow
By hoping you'll return before too long.
